## Act responsibly

Operating sustainability is an act of responsibility towards the future that can reap tangible benefits.

Today, consumers pay as much attention to secondary environmental aspects of a product as they do to the product itself. Aspects such as manufacturing, distribution and the operation of the product. Thus, ensuring that your entire supply chain is environmentally friendly has become a competitive advantage.

A systematic and long term integration of environmental aspects in an organisation is necessary – this is known as environmental management. With an ISO 14001 certification, you demonstrate your commitment to your clients and the public. Thereby conveying a modern and responsible image.

For specific industries, demands are being exerted by many stakeholders. They expect vendors to take up environmental friendly practices and may mandate ISO 14001 certification as a pre-requisite for qualification.

## 负责任的行动

可持续性的运作是合理的、对未来负责的行动。这也会让我们切实受益。

现今，消费者对于产品的生产、分销和使用是否环保的关注甚于产品本身。由此，确保整个供应链的环保成为了一个竞争优势。

在组织决策之中有必要对组织的环境问题进行系统和长远地考虑。通过 ISO 14001 认证，您向客户和公众证明了您对于环境的承诺，从而向公众展示贵公司现代而负责的企业形象。

此外，在某些特定的行业，许多利益相关方也表达了相应的要求。他们希望供应商采取环保的实践，并且将是否具备 ISO 14001 体系认证作为合作的前提条件。
