助您保护儿童安全

Children's safety is not optional

Safety and quality are among the highest priorities in the supply chain for toys and children's products, so they cannot be left to chance.

Your challenges

As stakeholders in the global children product industry working to ensure that manufacturers produce safe products while maintaining quality and safety across the supply chain, a number of challenges are faced in terms of rising costs and deviations in standards. Failure to achieve compliance leads to expensive reworking, which is increasing costs throughout the industry. The higher material costs in many markets around the world are also driving up production costs. At the same time, children product safety compliance is complicated, with varying national standards that deviate from international standards.

儿童安全绝不可大意

安全和质量是玩具及儿童产品供应链中最优先考虑的环节，因此生产商不应有侥幸心理。

您面临的挑战

全球儿童用品行业的利益相关者通过保持整个供应链的质量和安​​全，从而确保制造商生产安全的产品，因而在成本上升和标准偏差上面临着一系列挑战。未能符合规范会导致高昂的返工费用，从而致使整个行业的成本增加。全球众多市场中材料成本的增加也推动了生产成本的上​​涨。与此同时，由于各国的国家标准与国际标准存在诸多差异，儿童用品安全规范变得异常复杂。
