Water, Sanitation and Hygiene (WASH) Services

Fostering safe and sustainable
water and sanitation solutions

Your challenges

Rapid urbanisation in developing countries have seen many of the people migrating to the cities and ended up living in urban slum areas where governments struggle to provide effective water and sanitation systems. One of the major issues affecting water utilities is the considerable level of “non-revenue water” (NRW), which the financial viability of water utilities through lost revenues and increased operational costs.

Sanitation solution for urban slums where access to sewage network is almost non-existent, amid technology implementation, needs to address cost, space and the wider environment issues like waste and disposal. Sustainable sanitation solutions decrease environmental pollution, prevent the transmission of water-related diseases, and support economic and social development.

What WASH services does TÜV SÜD provide?

TÜV SÜD provides services for donors, investors, government and non-government organisations, manufacturers and technology developers in the WASH sector. These services are:

- **Feasibility studies** for implementation of water and sanitation programme and technologies.
- **Inspection and qualification** through field audits and inspection.
- **Technology evaluation** for manufacturers to understand the readiness of your systems in accordance to international standards.
- **Tender evaluation** to reduce risk and time spent on selection of water and sanitation solution.
- **Technical advisory** and implementation assistance to guide decision makers while helping to reduce complexity and information costs.

Why are these services important for your business?

Feasibility studies provide you with clear directions for selection of water and sanitation systems and business models appropriate in your context, providing you with the right information for ease of decision making.

Inspection and qualification with qualified certification bodies improves customer confidence of your products and through a thorough and quantifiable technology evaluation, we help manufacturers transfer their innovation as prototypes into the market.

Having a clear and defined tender evaluation reduces risk and improves comparability between different systems, providing you with clarity on the appropriate choice of product.

Our technical advisory will provide you with a clear understanding of the various technology options available, not only from a human health and environmental perspective, but also from a complete life cycle to ensure sustainability of your business.

How can we help you?

TÜV SÜD combines in-depth knowledge of the WASH sector with multidisciplinary technological expertise to ensure that your conception of a WASH project, programme or product is successful and sustainable. As an independent third-party service with core competencies in qualification, standardisation and certification, we can support you in making the right investment decisions.

Your business benefits

- **Save money** – by ensuring that decision making has been done with sufficient thoroughness, leading to sustainable WASH solutions.
- **Minimise risk** – by identifying and assessing risks in a structure manner, to ensure funds are properly used and liabilities are mitigated.

- **Demonstrate readiness** – our technological expertise combined with inspection, testing and certification capabilities as a trusted service provider, will give your customers confidence in your product.
- **Access global support** – with a worldwide network and presence that keeps abreast of the latest developments in the WASH sector, you can be sure of a clear path towards sustainable solutions.

Why choose TÜV SÜD?

TÜV SÜD is an independent and impartial service provider. Beyond ensuring neutrality and transparency for your projects, our objectivity instils confidence in the potential of new technologies and adds value and inspire trust to your business.

We adopt a systemic and interdisciplinary approach that covers all phases of project, from planning through to implementation, commissioning and maintenance. With our international expertise and local market knowledge, we customise solutions to the individual needs of our clients.

Add value. Inspire trust.

TÜV SÜD is a premium quality, safety and sustainability solutions provider that specialises in testing, inspection, auditing, certification, training and knowledge services.
